No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.

ABP83755
   Human; 121P2A3; cytostatic; immunostimulant; vaccine; SSH; humoral immune response; cellular immune response; suppression subtractive hybridisation; HLA; human leukocyte antigen.
The invention relates to a novel composition comprising a substance that modulates the status of a protein, 121P2A3. The composition of the invention has cytostatic and immunostimulant activity, and is useful as a vaccine. The 121P2A3 proteins and polynucleotides are useful for eliciting humoral or cellular immune response. The polynucleotides are useful for characterising cytogenetic abnormalities of this chromosomal locus, as tools that can be used to delineate cytogenetic abnormalities
                                                                                                                                                             New composition comprising a substance that modulates the status of 121P2A3 polypeptides, useful for eliciting humoral or cellular immune responses or in assessing the status of 121P2A3 gene products in normal
                                                                                                                                                                                                                                                       Challita-Bid PM, F

The proteins are useful for generating and characterising domain-specific antibodies, for identifying agents or cellular factors that bind to 121P2A3 or a particular structure domain, and in various therapeutic and diagnostic contexts, including cancer vaccines. The antibodies or T cells retire with the product are useful in passive or active immunisation, and in imaging methodologies for the management of cancer. The sequences shown in ABP83646 - ABP95595 represent peptides from the 121P2A3 variants of the invention
invention has cytostatic and immunostimulant activity, and is useful as a vaccine. The 12192A3 proteins and polynucleotides are useful for eliciting humoral or cellular immune response. The polynucleotides are useful for characterising cytogenetic abnormalities of this chromosomal locus, as tools that can be used to delineate cytogenetic abnormalities in the chromosomal region that encodes 12192A3 that may contribute to malignant phenotype, and in assessing the status of 12192A3 gene products in normal versus cancerous tissues. The proteins are useful for generating and characterising domain-specific antibodies, for identifying
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Human; 121P2A3; cytostatic; immunostimulant; vaccine; SSH; humoral immune response; cellular immune response; suppression subtractive hybridisation; HLA; human leukocyt
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                New composition comprising a substance that modulates the status of 121P2A3 polypeptides, useful for eliciting humoral or cellular immune responses or in assessing the status of 121P2A3 gene products in norms
                                                                                                                                                                                                                                                                                                       The invention relates to a novel composition comprising a substance that modulates the status of a protein, 121P2A3. The composition of the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Challita-Eid PM, I

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Query Match
                     The invention relates to a novel composition comprising a substance that modulates the status of a protein, 121223. The composition of the invention has cytostatic and immunostimulant activity, and is useful as a vaccine. The 121223 proteins and polynucleotides are useful for eliciting humoral or cellular immune response. The polynucleotides are useful for composition that can be used to delineate cytogenetic abnormalities in the chromosomal region that encodes 12123 that may contribute to malignant phenotype, and in assessing the status of 121223 gene products in normal versus cancerous tissues. The proteins are useful for generating and characterising domain-specific antibodies, for identifying agents or cellular factors that bind to 121223 or a particular structure domain, and in various therapeutic and diagnostic contexts, including cancer vaccines. The antibodies or cells reactive with the product are
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             agents or cellular factors that bind to 121P2A3 or a particular structure domain, and in various therapeutic and diagnostic contexts, including cancer vaccines. The antibodies or T cells reactive with the product are useful in passive or active immunisation, and in imaging methodologies for the management of cancer. The sequences shown in ABP83646 - ABP95595 represent peptides from the 121P2A3 variants of the invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        New composition comprising a substance that modulates the status 121P2A3 polypeptides, useful for eliciting humoral or cellular in responses or in assessing the status of 121P2A3 gene products in versus cancerous tissues.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Challita-Eid PM, F

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             SSSS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   밁
                                                                                  The invention relates to a novel composition comprising a substance that cc modulates the status of a protein, 121P2A3. The composition of the cinvention has cytostatic and immunostimulant activity, and is useful as a cytostatic and immunostimulant activity, and is useful as a cytostatic and immunostimulant activity, and is useful as a cytostatic proteins and polynucleotides are useful for capture or cellular immune response. The polynucleotides are cytostatic abnormalities of this chromosomal control cytostatic abnormalities of the chromosomal region that encodes 121P2A3 that may contribute to complete the chromosomal region that encodes 121P2A3 that may contribute to complete the chromosomal region that encodes 121P2A3 that may contribute to complete the chromosomal region that encodes 121P2A3 that may contribute to complete the chromosomal region that encodes 121P2A3 that may contribute to complete the chromosomal region that encodes 121P2A3 that may contribute to contribute for contrating and characterising domain-specific antibodies, for identifying agents or cellular factors that bind to 121P2A3 or a particular structure complete contexts, including context vaccines. The antibodies or T cells reactive with the product are useful in passive or active immunisation, and in imaging methodologies of for the management of cancer. The sequences shown in ABB83646 - ABB95595
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Matches

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Ş
                                                The invention relates to a novel composition comprising a substance that CC modulates the status of a protein, 121P2A3. The composition of the CC invention has cytostatic and immunostimulant activity, and is useful as a CC vaccine. The 121P2A3 proteins and polymucleotides are useful for celiciting humoral or cellular immune response. The polymucleotides are CC useful for characterising cytogenetic abnormalities of this chromosomal locus, as tools that can be used to delineate cytogenetic abnormalities in hormal versus cancerous tissues. The proteins are useful for CC malignant phenotype, and in assessing the status of 121P2A3 gene products in normal versus cancerous tissues. The proteins are useful for CC agents or cellular factors that bind to 121P2A3 or a particular structure domain, and in various therapeutic and diagnostic contexts, including CC cancer vaccines. The antibodies or T cells reactive with the product are useful in passive or active immunisation, and in imaging methodologies for the management of cancer. The sequences shown in ABP83646 - ABP95595
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Query Match

                                                                                                                                                                                                                                                                                               The invention relates to a novel composition comprising a substance that modulates the status of a protein, 12122A3. The composition of the invention has cyrostatic and immunostimulant activity, and is useful as a vaccine. The 1212A3 proteins and polynuclectides are useful for callular immune response. The polynuclectides are useful for characterising cytogenetic abnormalities of this chromosomal locus, as tools that can be used to delineate cytogenetic abnormalities in the chromosomal region that encodes 1212A3 that may contribute to malignant phenotype, and in assessing the status of 1212PA3 gene products in normal versus cancerous tissues. The proteins are useful for generating and characterising domain-specific antibodies, for identifying agent or cellular factors that bind to 1212A3 or a particular structure domain, and in various therapeutic and diagnostic contexts, including cancer vaccines. The antibodies or T cells reactive with the product are useful in passive or active immunisation, and in imaging methodologies for the management of cancer. The sequences shown in ABB83646 - ABB995595 represent peptides from the 1212PA3 variants of the invention
                                                                                                                     Query Match

                                                                                                                                                     The invention relates to a novel composition comprising a substance that CC modulates the status of a protein, 121P2A3. The composition of the cinvention has cytostatic and immunostimulant activity, and is useful as a CC vaccine. The 121P2A3 proteins and polynucleotides are useful for CC eliciting humoral or cellular immune response. The polynucleotides are useful for characterising cytosenetic abnormalities of this chromosomal CC useful for characterising cytosenetic abnormalities of this chromosomal cC in the chromosomal region that encodes 121P2A3 that may contribute to CC malignant phenotype, and in assessing the status of 121P2A3 gene products in normal versus cancerous tissues. The proteins are useful for CC generating and characterising domain-specific antibodies, for identifying CC agents or cellular factors that bind to 121P2A3 or a particular structure CC domain, and in various therapeutic and diagnostic contexts, including CC cancer vaccines. The antibodies or T cells reactive with the product are CC useful in passive or active immunisation, and in imaging methodologies CC represent peptides from the 121P2A3 variants of the invention

                                                                                                                                                                                                                                                                                                    The invention relates to a novel composition comprising a substance that CC modulates the status of a protein, 121P2A3. The composition of the CC invention has cytostatic and immunostimulant activity, and is useful as a CC vaccine. The 121P2A3 proteins and polynucleotides are useful for CC eliciting humoral or cellular immune response. The polynucleotides are CC useful for characterising cytogenetic abnormalities of this chromosomal CC cloue, as tools that can be useful abnormalities of the chromosomal region that encodes 121P2A3 that may contribute to CC malignant phenotype, and in assessing the status of 121P2A3 gene products CC in normal versus cancerous tissues. The proteins are useful for CC generating and characterising domain-specific antibodies, for identifying CC agents or cellular factors that bind to 121P2A3 or a particular structure domain, and in various therapeutic and diagnostic contexts, including CC cancer vaccines. The antibodies or T cells reactive with the product are CC useful in passive or active immunisation, and in imaging methodologies for the management of cancer. The sequences shown in ABP83646 - ABP95595 CC represent peptides from the 121P2A3 variants of the invention
                                                                                                                                       밁

                                                                                                                                                                                                                    S
                                                                                                                                                                                          밁
                                                                                                                                                                                                                                                                                                                                               The invention relates to a novel composition comprising a substance that CC modulates the status of a protein, 121P2A3. The composition of the CC invention has cytostatic and immunostimulant activity, and is useful as a CC vaccine. The 121P2A3 proteins and polynucleotides are useful for CC eliciting humoral or cellular immune response. The polynucleotides are CC useful for characterising cytogenetic abnormalities of this chromosomal region that encodes 121P2A3 that may contribute to CC malignant phenotype, and in assessing the status of 121P2A3 gene products CC in normal versus cancerous tissues. The proteins are useful for CC agents or cellular factors that bind to 121P2A3 or a particular structure domain, and in various therapeutic and diagnostic contexts, including CC cancer vaccines. The antibodies or T cells reactive with the product are CC cancer vaccines. The antibodies or T cells reactive with the product are CC cuseful in passive or active immunisation, and in imaging methodologies for the management of cancer. The sequences shown in ABP83646 - ABP95595 CC represent peptides from the 121P2A3 variants of the invention

                                                                                                                                                                                                                                                                                                                                                                                                           밁
                                                                                                                                                                                                                                                                                                   ઠ
                                                                                                                                                                                                                                                                                                                                                                                                                                      The invention relates to a novel composition comprising a substance that commodulates the status of a protein, 1212PA3. The composition of the cinvention has cytostatic and immunostimulant activity, and is useful as a vaccine. The 1212PA3 proteins and polynucleotides are useful for cellular immunostimulant response. The polynucleotides are useful for useful for characterising cytogenetic abnormalities of this chromosomal locus, as tools that can be used to delineate cytogenetic abnormalities in the chromosomal region that encodes 1212PA3 that may contribute to malignant phenotype, and in assessing the status of 121PPA3 gene products in normal versus cancerous tissues. The proteins are useful for generating and characterising domain specific antibodies, for identifying agents or cellular factors that bind to 121P2A3 or a particular structure domain, and in various therapeutic and diagnostic contexts, including cancer vaccines. The antibodies or T cells reactive with the product are useful in passive or active immunisation, and in imaging methodologies for the management of cancer. The sequences shown in ABP83546 - ABP95595 crepresent peptides from the 121P2A3 variants of the invention
                                                                                                                                                                                                                                                                                                                                        Matches

                                                                                                                                                                                                                                                                                                                                                                    S
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 CC invention has cytostatic and immunostimulant activity, and is useful as a C vaccine. The 121P2A3 proteins and polymucleotides are useful for Celiciting humoral or cellular immune response. The polymucleotides are useful for characterising cytogenetic abnormalities of this chromosomal focus, as tools that can be used to delineate cytogenetic abnormalities CC in the chromosomal region that encodes 121P2A3 that may contribute to CC malignant phenotype, and in assessing the status of 121P2A3 gene products in normal versus cancerous tissues. The proteins are useful for CC generating and characterising domain-specific antibodies, for identifying agents or cellular factors that bind to 121P2A3 or a particular structure CC domain, and in various therapeutic and diagnostic contexts, including CC cancer vaccines. The antibodies or T cells reactive with the product are useful in passive or active immunisation, and in imaging methodologies for the management of cancer. The sequences shown in ABP83646 - ABP95595 CC represent peptides from the 121P2A3 variants of the invention

                                                                                                                                                                                                                                                                                                                                                                   밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                cc modulates the status of a protein, 12122A3. The composition of the convention has cytostatic and immunostimulant activity, and is useful as a cc vaccine. The 1212A3 proteins and polynucleotides are useful for calcular immune response. The polynucleotides are useful for characterising cytogenetic abnormalities of this chromosomal closes, as tools that can be used to delineate cytogenetic abnormalities of in the chromosomal region that encodes 1212A3 that may contribute to cc malignant phenotype, and in assessing the status of 1212A3 gene products in normal versus cancerous tissues. The proteins are useful for cg generating and characterising domain-specific antibodies, for identifying cancer or cellular factors that bind to 1212A3 or a particular structure domain, and in various therapeutic and diagnostic contexts, including cancer vaccines. The antibodies or T cells reactive with the product are cuseful in passive or active immunisation, and in imaging methodologies cor represent peptides from the 1212A3 variants of the invention

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            S
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              The invention relates to a novel composition comprising a substance that CC modulates the status of a protein, 121P2A3. The composition of the CC invention has cytostatic and immunostimulant activity, and is useful as a CC vaccine. The 121P2A3 proteins and polymucleotides are useful for cytostatic and immunostimulant activity, and is useful as a CC useful for characterising cytosenetic abnormalities of this chromosomal colous, as tools that can be used to delineate cytosenetic abnormalities CC in the chromosomal region that encodes 121P2A3 that may contribute to CC malignant phenotype, and in assessing the status of 121P2A3 gene products CC in normal versus cancerous tissues. The proteins are useful for CC generating and characterising domain-specific antibodies, for identifying CC agents or cellular factors that bind to 121P2A3 or a particular structure domain, and in various therapeutic and diagnostic contexts, including CC cancer vaccines. The antibodies or T cells reactive with the product are CC useful in passive or active immunisation, and in imaging methodologies for the management of cancer. The sequences shown in ABP83646 - ABP95595 CC represent peptides from the 121P2A3 variants of the invention

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            The invention relates to a novel composition comprising a substance that CC modulates the status of a protein, 1212PA3. The composition of the CC invention has cytostatic and immunostimulant activity, and is useful as a CC vaccine. The 1212PA3 proteins and polynucleotides are useful for CC eliciting humoral or cellular immune response. The polynucleotides are useful for useful for characterising cytosenetic abnormalities of this chromosomal course, as tools that can be used to delineate cytogenetic abnormalities in the chromosomal region that encodes 1212PA3 that may contribute to CC malignant phenotype, and in assessing the status of 1212PA3 gene products in normal versus cancerous tissues. The proteins are useful for generating and characterising domain specific antibodies, for identifying agents or cellular factors that bind to 1212PA3 or a particular structure domain, and in various therapeutic and diagnostic contexts, including cancer vaccines. The antibodies or T cells reactive with the product are useful in passive or active immunisation, and in imaging methodologies for the management of cancer. The sequences shown in ABP83546 - ABP95595 crepresent peptides from the 1212PA3 variants of the invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Human; 121P2A3; cytostatic; immunostimulant; vaccine; SSH; humoral immune response; cellular immune response; suppression subtractive hybridisation; HLA; human leukocyte

The invention relates to a novel composition comprising a substance that CC modulates the status of a protein, 121P2A3. The composition of the CC invention has cytostatic and immunostimulant activity, and is useful as a CC vaccine. The 121P2A3 proteins and polynucleotides are useful for CC eliciting humoral or cellular immune response. The polynucleotides are CC useful for characterising cytogenetic abnormalities of this chromosomal CC locus, as tools that can be used to delineate cytogenetic abnormalities CC in the chromosomal region that encodes 121P2A3 that may contribute to CC malignant phenotype, and in assessing the status of 121P2A3 gene products CC in normal versus cancerous tissues. The proteins are useful for CC generating and characterising domain-specific antibodies, for identifying agents or cellular factors that bind to 121P2A3 or a particular structure CC domain, and in various therapeutic and diagnostic contexts, including CC cancer vaccines. The antibodies or T cells reactive with the product are CC useful in passive or active immunisation, and in imaging methodologies CC for the management of cancer. The sequences shown in ABP83646 - ABP95595 CC represent peptides from the 121P2A3 variants of the invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          New composition comprising a substance that modulates the status of 121P2A3 polypeptides, useful for eliciting humoral or cellular immune responses or in assessing the status of 121P2A3 gene products in normal
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Claim 13; Page 182; 362pp; English.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    versus cancerous tissues.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               2003-092956/08

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  8G

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Score
